Content List

Sr. No.	Topics	Page No.
Chapter: 01		
CURRENT EDUCATIONAL AFFAIRS OF PAKISTAN		
1.	Current National and Provincial Literacy Rates, Current Educational Policy	01
2.	Human Development Index (HDI), GDP on Education, Vision 2025	02
3.	Current Federal and Provincial Ministers of Education	03
4.	Enrollment Rates, GER, NER, OOSCs, Dropout Rates	03
5.	Taleem Ghar, Tele-School, World Education Day, Literacy & Teachers Day	04
6.	UNESCO Global Education Monitoring (GEM), Pakistan Edu Statistics	05
7.	International Conferences on Education in Pakistan	05
8.	PESP, PECTAA, STEAM	06
9.	Nazra Act, New Deal Punjab, SNC, Subah Nao Schools, AQAL Project	07
Chapter: 02		
INTRODUCTION TO EDUCATION & FOUNDATIONS OF EDUCATION		
1.	Etymology and Definition of Education, Educatum, Educology	08
2.	Education in views of Greek, Western and Muslim Scholars	09
3.	Components of Education	09
4.	Modes of Education Formal, Non-Formal and Informal Education	10
5.	Vocational and General Education, NAVTTC, TEVTA, Basic Education	11
6.	Avocational Education, Peace Education	11
7.	Green Education, Inclusive Education, Blended and Infusion Education	12
8.	ECCE, Integral Education, Recurrent Education, Open Education	12
9.	Human Abilities developed by Education, Levels of Education In Pakistan	13
10.	Literacy and All Types of Literacy	14
11.	Foundations of Education	15
12.	Islamic Foundations of Education	15
13.	Philosophical Foundations of Education	16
14.	Psychological Foundations of Education	17
15.	Sociological Foundations of Education	17

16.	Historical Foundations of Education	18
17.	Economical Foundations	19
18.	International Standard Classification of Education (ISCED) 2011	19
19.	National Standards for Quality Education (MNSQEs) in Pakistan	20
Chapter: 03		
TEACHING METHODOLOGY/ INSTRUCTIONAL STRATEGIES		
1.	Definition and Components of Teaching, Tutoring vs Teaching	22
2.	Pedagogy/andragogy/heutagogy/Cybergogy/Peeragogy/Critical Pedagogy	23
3.	Maxims of Teaching, Learning Styles, Modalities of Teaching	24
4.	Principles of Teaching, Instructions and Its Types	25
5.	Teaching vs Instructions, Learning, Laws of learning	26
6.	Key Terms in Learning, Several Types of Learning	27
7.	Modern Learning, E/Blended/Flipped/Augmented/Contemporary/Online	30
8.	Teaching Approach- Teaching Strategy- Method- Teaching Technique	31
9.	Styles of Teaching, Tactics of Teaching	32
10.	Phases of Teaching, Five Basic Teaching Styles	33
11.	Teacher-Centered Methods vs Students-Centered Methods	34
12.	Lecture Method	35
13.	Discussion Method (Fishbowl, Buzz, Symposium, Panel, Seminar)	36
14.	Demonstration Method	38
15.	Dale Cone of Learning, Project Method, Kilpatrick's 4 Types of Project	39
16.	Discovery Learning, Enactive/Iconic/symbolic modes, Heuristic Learning	41
17.	Activity Based Method/Learning by Doing/Tactile Learning	42
18.	Cooperative Learning (Jigsaw, Circle of sage, Talking Tickets etc.	43
19.	Problem Solving, Scientific Method, Inductive & Deductive Method	44
20.	Socratic Question Answer Method, Recitation Method	46
21.	Information Processing, Story Telling, Individual Instruction Program	47
22.	Differentiated Instructions, Group Instruction Brainstorming Method	48
23.	Thematic Instructions,	49
24.	Field Trips, Elicitation Method	50
25.	Mind Mapping, Case study, Macro Teaching	51
26.	Drill method, Modern Methods of Teaching, Suggestopedia	52
27.	Skinner Program Learning/ Programmed Instruction	52

28.	Computer Assisted Instructions (CAI)	53
29.	Micro-Teaching	54
30.	Connected Classrooms, Simulation Method	55
31.	Methods of Online Learning (Blogs, MOOC, MOODLE)	56
32.	Experiential Learning , Kolb's Experiential Learning cycle, KELP Learning Exposition and Illustration in Teaching	57
33.	Teleconferencing	58
34.	Instructional/Lesson Planning, Types of Lesson Plans, PECTAA Lesson	59
35.	Herbert 5 Stages Lesson Plan, Morrison Approach for Lesson Planning	60
36.	Teacher Diary, Audio Visual Aids (Teaching Aids)	61
37.	Projected Aids (OHP, Opaque projector, Multimedia, Film strips)	62
38.	Non-Projected Aids (Graphs, Charts, Boards, Maps, Models, Mediums)	62
39.	Graphic Organizer	65
39.	Theorist and Teaching	66
40.	Level of Teaching (Memory, Understanding and Reflective Levels)	67
41.	Team Teaching (Station Teaching, Alternative and Parallel Teaching)	68
42.	Multigrade Teaching (MGT), Feedback in Teaching Learning	68
43.	Miscellaneous Concepts and Important Definitions	69
44.	Learning Models	71
45.	Classroom Problems, Schools Problems, Thinking and its Types	71
46.	The 4 DoK Levels (Webb's Depth of Knowledge)	72
47.	Teaching Models	73
48.	Glaser Basic Teaching Model, Joel M. Levine Model	74
49.	Homework its Types and Importance	75

Chapter: 04

TESTING, MEASUREMENT, ASSESSMENT & EVALUATION/

TAXONOMIES IN EDUCATION

1.	Testing Elements (Test, Assessment, Measurement, Evaluation)	76
2.	Right Sequence of Testing Elements, Assessment vs Evaluation	77
3.	Good Assessment, Assessment for/As/of Learning	78
4.	Assessment For Learning (Formative/Diagnostic/Placement Assessment)	79
5.	Readiness Test, Pre Test, Continuous Test	80
6.	Assessment As Learning (Ipsative/Self/Peer Appraisal)	80

7.	Assessment Of Learning (Summative/Interim, Benchmark)	81
8.	Steps, Types and Phases in Evaluation, Process & Product Assessment	82
9.	Classroom assessment techniques (CATs), Iterative Nature of Assessment	83
10.	Portfolio Assessment , Portfolio, Its Types, Importance	84
11.	Portfolio Vs Work Samples, Formal Assessment, Informal Assessment	85
12.	Verbal, Non-Verbal, Concept, Screening, Psychological Assessment	86
13.	Types of Tests by Purpose Standardized Test vs Non-Standardized Test	87
14.	Norm-Referenced Test (NRT) vs Criterion-Referenced Test (CRT)	87
15.	Types of Tests by Method (Subjective Tests vs Objective Tests)	88
16.	Constructive response questions (CRQs) vs Restricted response questions	89
17.	Supply and Selection Type Objectives Questions (SAQs, Fill the Blanks)	89
18.	MCQS, Matching Columns, True False Questions	90
19.	Steps for Test Construction, Table of Specification (TOS)	91
20.	Aims, Goals, Objective, SLOs	92
21.	Educational, Instructional & Behavioral Objectives (SMART objectives)	92
22.	Taxonomies of Education	93
23.	Bloom Taxonomy, Cognitive Domains, Revised Cognitive Domain	93
24.	Affective Domain	95
25.	Krathwohl Psychomotor domain (Anita Harrow and Dave domain	96
26.	Solo Taxonomy (Biggs & Collis 1982)	98
27.	Bloom vs SOLO, Inter Boards Coordination Commission (IBCC), PBCC	99
28.	Item Development, Item Analysis, Facility Index, Discrimination Power	100
29.	Test Assessment vs Item Assessment, Assessment Theories	102
30.	Grading, Rubrics Types of Rubrics	103
31.	Norm Referenced Scores vs Criterion Referenced Scores	104
32.	Report Writing	105
33.	Parent-Teacher Meeting (PTM) / Parent-Teacher Conference (PTC)	106
34.	National Assessment Agencies (BISE, NIAS, PEC, PIE)	106
35.	National Achievement Test (NAT) of Pakistan	107
36.	International Assessment Agencies (ASER, TIMMS, READ)	107
37.	Mean, Median, Mode, Range, Frequency	108
38.	Quartile, Percentile, Skewness, Kurtosis	109
39.	Performance Test, Authentic Vs. Traditional Assessment.	110
40.	Maximum Performance Test, Aptitude Test, Typical Performance Test	111

41.	Achievement, Speed Test, Power Test,	112
42.	Contemporary Model of Assessment's, Attitude Test, Anecdotal Record	113
43.	Interview, Intelligence and Types of Intelligence Test	113
44.	Adversity Quotient (AQ), Social Quotient (SQ), Emotional Quotient (EQ)	114
45.	Intelligence Quotient (IQ), Intelligence Test, Binet Simon Scale	115
46.	Wechsler Intelligence Scale (WAIS, WISC, WPPSI) and SB-V	116
47.	Fluid Reasoning, SIT-4 , PMA, DATB, GATB	117
48.	Modern Assessments, CAA, Drag-Drop, Army Alpha & Army Beta Tests	117
49.	Classroom Observation, Types of Observations, Recording Observations	118
50.	Miscellaneous Definitions	119
51.	Qualities of Standardized Test	120
52.	Test Validity, All Types of Validity	121
53.	Reliability and All Types of Reliability	123
54.	Relation between Validity and Reliability	124
55.	Types of Questions	125
56.	Accommodated Assessment, Shared Grading, Collaborative Assessment	126
Chapter: 05		
CURRICULUM DEVELOPMENT		
1.	Introduction to Curriculum, Experts Views, Curricular Activities	127
2.	Curricular and Co-curricular Activities, Role of Curriculum	128
3.	Syllabus, Course, and Subject matter/Contents	129
4.	Modern Trends in Curriculum, Six Features Curriculum	129
5.	21st Century Skills, Point of Views about Curriculum	130
6.	Elements of Curriculum, Objectives and Types of Objectives of curricula	131
7.	Contents, Methods for Content Selection and Organization of Contents	132
8.	Breadth, Depth, Sequence, Vertical and Horizontal Organization	133
9.	Intra and Inter-disciplinary Integration, Pedagogy, Curriculum Evaluation	134
10.	UNESCO 4 Pillars of Education & Curriculum, 03 i of Curriculum	134
11.	Scope of Curriculum, Foundation of Curriculum	135
12.	Philosophical/psychological/social, Historical Foundations of Curricula	136
13.	Values Incorporated into Curriculum	136
14.	Curriculum Design	137
15.	Subject Centered Design	138

16.	Activity Centered curriculum , Integrated Curriculum, Core Curriculum	139
17.	Hidden curriculum, Null curriculum, Developmental, functional curricula	140
18.	Explicit, Implicit, Spiral, Intended, , Attained, Behavioral Curricula	141
19.	Other key types of Curriculum	141
20.	Global Curriculum, Montessori, Waldorf, Experiential Curriculum	142
21.	Curriculum Models, Process and Product Model of Curriculum	143
22.	Tyler Model 1949	144
23.	Taba Model 1962, Wheeler Cyclical Model 1967	145
24.	Kerr Model 1968, Situational Analysis, Nicholls model 1976	146
25.	Stage Based/Flow Chart Model 1989, Stake Model, CIPP Model	147
26.	Scriven's Goal-Free Model, Ritz Model, Parallel Curriculum Model	148
27.	Curriculum Change and Innovation, Curriculum Mapping	149
28.	Curriculum Planning and Development	150
29.	Curriculum Development Process in Pakistan at school level-ECCE-12 th	151
30.	Higher Education Curriculum Development (College, University)	153
31.	Textbook Development	153
32.	Problems in Curriculum Development in Pakistan	154
33.	History of Curriculum Development in Policies of Pakistan	154
34.	History of Curriculum Institutes in Pakistan	155
35.	Curriculum Development structures in Punjab	156
36.	Curriculum Development structures in Sindh	157
37.	Curriculum Development structures in KPK	158
38.	Curriculum Development structures in Balochistan	159
39.	Curriculum Development structures in Federal, GB and AJK	159
40.	History of National Curricula in Pakistan	160
41.	National curriculum-2006, Strands, Standards, Benchmarks, SLOs,	160
42.	Single National Curriculum – 2020	161
43.	National Curriculum Framework (NCF)	163
44.	Workload for Teachers	163
45.	TALEEM Project Punjab 2021-2026	164
46.	Boys scouts Girls Guides	165
Chapter: 06 EDUCATIONAL PHILOSOPY		

1.	Definition and Derivation of Philosophy, Areas of Philosophy	166
2.	Epistemology, Axiology, Ontology	167
3.	Difference between Ontology & Metaphysics	167
4.	Scope and Styles of Philosophy (Speculative, Prescriptive, Analytical),	168
5.	Knowledge and All important Types of Knowledge	168
6.	Educational Philosophy and Its Scope	170
7.	Relationship between Philosophy and Educational Philosophy	170
8.	General & Educational Philosophy, Types of Philosophies	171
9.	Idealism	172
10.	Realism	173
11.	Comparison between idealism & Realism, Pragmatism	175
12.	Existentialism	176
13.	Naturalism	178
14.	Comparison of Idealism/Realism/Pragmatism/Existentialism/Naturalism	180
15.	Perennialism	181
16.	Progressivism	182
17.	Comparison of Pragmatism and Progressivism	183
18.	Essentialism	184
19.	Reconstructionism	185
20.	Eclectic Philosophy, Islamic Philosophy in Education	186
21.	How All philosophies are rooted in some ways in Islamic philosophy	186
22.	Positivism, Modernism, Postmodernism, Transcendentalism, Marxism	187
23.	Rationalism/Neoclassicism/Hedonism, Wahdatulajood, Wahadatulshahud	188

Chapter: 07

EDUCATIONAL PSYCHOLOGY / CHILD DEVELOPMENT

1.	Introduction to Psychology, Branches and Different Eras of Psychology	189
2.	Areas of Educational Psychology, Scope of Educational Psychology	190
3.	Methods of Psychology, Introspection Method	190
4.	Clinical Method , Psychophysical Method	191
5.	Experimental method, Differential method	192
6.	Growth & Development, Principles and Types	193
7.	Social Development, Parten Six stages of Play	194
8.	Bandura Social Learning Theory, Bobo doll Experiment, Aggression	195

9.	Erikson Psycho-Social Development Theory	196
10.	Moral Development	197
11.	Piaget and Kohlberg Moral Development Theories	198
12.	Physical Development	199
13.	Language Development, Phases of Language Development, Nativism	200
14.	Cognitive Development, Piaget Cognitive Development Theory	201
15.	Accommodation and Assimilation	203
16.	Hot and Cold Cognition, Vygotsky's Theory of Social Development	204
17.	Cognitive Theories of Learning, Bruner Discovery Learning Theory	206
18.	Modal Model (Information processing), Transformational learning theory	207
19.	Emotional Development, Ares of Emotion	208
20.	Theories of Emotions	209
21.	Individual Differences	210
22.	Learning Difficulties (Learning Limits)	210
23.	Schools of Psychology	211
24.	Structuralism vs Functionalism	212
25.	Behaviorism	213
26.	Cognitivism (Cognitive Psychology)	214
27.	Gestalt Psychology, Humanist Psychology	215
28.	Psychoanalysis, Conscious, Unconscious, Sub-conscious mind,	216
29.	Id, Ego, Superego	217
30.	Transpersonal Psychology	218
31.	Bronfenbrenner's Ecological Theory	219
32.	Psychosexual Development, Defense Mechanism, Eros & Thanatos	220
33.	Behavioral Learning Theories	221
34.	Classical Conditioning	221
35.	Operant Conditioning	223
36.	Difference between Reinforcement & Punishment	224
37.	Learned helplessness, Trial and Error Theory and Laws of Learning	225
38.	Theory of Conditions of Learning	227
39.	Motivation, Its Types, Primary Motives and Secondary Motives, Interest	227
40.	Maslow Theory/Hierarchy of Needs	228
41.	Alderfer ERG Theory, Two Factor Theory, McClelland Acquired Needs	230
42.	McDougall's Theory of Instinct, Hull Drive Reduction Theory	230

43.	Latent Learning, Purposive Behaviorism, Cognitive Map Theory	231
44.	Learning Theories, Behaviorism, Cognitivism	232
45.	Humanism, Constructionism, Social Learning, Connectivism	233
46.	Memory and its Types, Personality	234
47.	Theories of Personality, Jung, Cattell, Eysenck and Roger Theories	235
48.	Rogers Client-Centered Therapy, Francis Galton personality inventory	236
49.	Theories of Intelligence,	237
50.	Biological Bases of Behavior, Nervous System, Brain and Its structure	240
51.	Important Theories	242
Chapter: 08		
ADMINISTRATION, MANAGEMENT, SUPERVISION & LEADERSHIP		
1.	Administration and Management	243
2.	Elements of Management POCCC, POSDCORB, POSDC, POSDIR etc.,	244
3.	Definitions of Key Concepts, Management Roles	245
4.	Management Skills, Levels of Management	246
5.	Three Tiers of Management in Pakistan, Macro and Micro Management	247
6.	Islam & Management, Approaches to Management, Classical Approaches	248
7.	Taylor Scientific Management Theory	249
8.	Fayol Operational Management Theory, Weber Bureaucracy Theory	250
9.	Behaviorist Approach, Elton Mayo Human Relation Perspective Theory	251
10.	Hawthorn Studies, Motivation in Management, Theory X, Theory Y & Z	252
11.	Quantitative Approach, Operations Management, MIS, TQM	253
12.	Contemporary Approaches	253
13.	System Theory, Contingency Theory	254
14.	Peter Drucker Management Theory, Chaos Theory	255
15.	Motion Study, Structural Looseness, The Managerial Grid Model	256
16.	Motivation In Management, Social Aspects in Management	256
17.	Simon Administrative Behavior, Mindfulness in Organization,	256
18.	Expectancy theory, Need satisfaction Questionnaire, S-O-B-C Model	256
19.	Single and Double Loop learning	256
20.	Inspection vs Supervision	256
21.	Monitoring and Mentoring	257
22.	Organization Its Environment and Structure	258

23.	Decision Making, Importance of decisions making	261
24.	Vroom-Yetton Model, Types of Decisions	262
25.	Leader and Leadership, Levels and Styles of Leaders	263
26.	Types of Leaders, Powers of Leaders	264
27.	Theories of Leadership, Great Man Theory	265
28.	Trait Theory, Big five Trait Theory (OCEAN), Cattle Theory of Trait	266
29.	Behavioral Theory, Transactional Theory and Transformational Theory	267
30.	The Managerial Grid Model	267
31.	Situational Theories, Hersey-Blanchard Situational Leadership Theory	268
32.	Fred Edward Fiedler Contingency Theory, Leadership Qualities	269
33.	Vision and Mission Statement, Conflict Management, Risk Management	270
34.	Knowledge Management (KM), Change Management, Team Building	271
35.	School Management	271
36.	School Policy and its Types	272
37.	Time Management	273
38.	Library management, Human resource management/Educational planning	274
39.	Budget, Budget Manual (BM), Types of Budget	275
40.	SNE (Schedule of New Expenditure)	276
41.	FTF, NSB, PIFRA, G.P Funds.	277
42.	Audits and Types of Audit	278
43.	DDO, Public Procurement Regulatory Authority (PPRA), Tax Collection	279
44.	Duties and Responsibilities of Heads of Institutions	280
45.	Total Quality Management (TQM), Stakeholders Consultations	281
46.	SWOT Analysis (Strengths, Weaknesses, Opportunities, Threats)	282
47.	School Council (SC) 2024	283
48.	Performance Evaluation Report (PER)	285
49.	Consolidation of Primary Schools, TA, DA Rules, Devolution of Power	286
50.	Dastoor-ul-Amal Punjab, LND	287
51.	Structure of School and Higher Education Department (SED) Punjab	288
Chapter: 09		
EDUCATIONAL PLANNING		
1.	Futurology, Strategy, Plan, Planning, UNESCO steps for Planning	289
2.	Educational Planning	289

3.	Steps in Educational Planning, Instructional Planning vs Educational Planning, Education System, Educational Program, Milieu	290
4.	Education Cycle, Academic Year, Curriculum Planning	291
5.	Assessment Planning, Key Advantages of Educational Planning	291
6.	Planning Process in Pakistan	291
7.	Various Plans Pakistan (6 Years plan, 5 years plan, MTDF)	292
8.	13th Five Year Plan- 2024-2029 (Current Plan)	293
9.	Planning Commission of Pakistan	293
10.	Types of Planning	294
11.	Types of Plans	294
12.	Indicators of Educational Planning and Development	295
13.	Approaches To Educational Planning, Models of Financing	296
14.	Project Management Cycle, Project, Program, Project Cycle, PC Forms	297
Chapter: 10		
HUMAN RESOURCE MANAGEMENT (HRM)		
1.	HRM, Roles of HRM, Human Resource Process (HRP)	298
2.	Techniques to Forecast HR Needs	298
3.	Job Analysis, Job Synopsis, Need Analysis	299
4.	Recruitment and Selection, Channels of Recruitment	299
5.	Deputation, Training and Development	300
6.	Appraisal and Evaluation	301
7.	Pension Rules, Educational Management Information System (EMIS)	302
8.	Punjab HRMIS, SIS, Punjab Civil Servants Act 1974, Educational Law	303
9.	Leave Rules, Revised Leave Rules 1981	304
10.	Punjab Employees' Efficiency Discipline, Accountability Act (PEEDA)	307
11.	Protection Against Harassment of Woman at Workplace Act, 2010	308
Chapter: 11		
SCHOOL RECORD		
1.	School Record, Responsibility of Record Keeping, School Registers	309
2.	Categories of School Record	309
3.	Statutory & Non-Statutory Records, Perishable, non-Perishable Record	310
4.	Principles For Maintaining Records	310
5.	Log-book, Order Book, Visitor's Book, Staff Leave Register	311

6.	Academic Calendar, Personal Files, Service Register	311
7.	Correspondence Register, Circular of file/Register, Stock Register	312
8.	Library Catalogue, Accession Register, Contingent Register	313
9.	Cash Book, Ledger Folio, Acquaintance Roll	313
10.	FTF, NSB, Teachers Attendance Register, Admission withdrawal Register	314
11.	Student Attendance Register, Movement register, Punjab Education code	315
12.	Mode of Keeping Records	315
Chapter 12 CLASSROOM MANAGEMENT		
1.	Classroom, Management, Classroom Management and its Importance	317
2.	Classroom Management, Classroom Control and Classroom Discipline	317
3.	Components of Classroom Management (Content, Conduct, Covenant)	318
4.	Overt Management Approaches	318
5.	Covert Management Approaches	319
6.	Evaluation and Dimensions of Classroom Management	320
7.	Physical Space Management	321
8.	Management Styles (Authoritarian, Authoritative, Permissive, Indulgent)	321
9.	Techniques for Better Classroom Management	322
10.	Conflict Resolution Classroom Problems with solutions	322
11.	Problem, Issue and Challenge	323
12.	Temperament, Classroom Management Models	324
13.	Teacher Effectiveness Training (TET), PBIS	325
13.	Behavior Modification Techniques	326
14.	Principles of Behaviour Correction	327
15.	Corporal Punishment, Interaction analysis category system	328
16.	Alfred Adler's Individual Psychology	329
17.	Dropout, Gross and Net Enrollment Rate (GER), (NER)	330
18.	Child Labour, Truancy	331
19.	Do's and Don'ts in Classroom Management	332
20.	Bullying	332
21.	Rules and Routines in Classrooms	333
22.	Learning Environment	334
23.	Child Friendly School Environment-CFSEs	335
24.	School and Classroom Problems	337

Chapter 13**HISTORY OF EDUCATION/ PERSPECTIVE OF EDUCATION/ EDUCATIONAL
PLAN POLICIES IN PAKISTAN****Section 01- The Muslim Educationists**

1.	Holy Prophet Muhammad PBUH	338
2.	Imam Ghazali	339
3.	Ibne Khaldun	340
4.	Alfa Rabi, Ibn-E-Rushed and Ibn-E-Seena	341
5.	Allama Zarnooji and Sir Syed Ahmad Khan	342
6.	Shah Wali Ullah, Allama Modudi, Allama Muhammad Iqbal	343

Section 02- The Greek Educationists

7.	Teacher-Pupil Lineage, Athens, Sparta Education system	344
8.	Socrates	345
9.	Plato	346
10.	Aristotle	347
11.	Names of Schools of All Scholars	348

Section 03- The Western Educationists

12.	Johan Dewey, Horace Mann	348
13.	Helen Park Hurst, Rousseau	349
14.	Pestalozzi, John Locke, Herbert	350
15.	Frobel, Montessori	351
16.	Reggio Emilia, Waldorf schools	352
17.	Paulo Freire, History of Important Universities	353

Section 04- Education in Subcontinent

18.	Outline of History	353
19.	Pre-British, East India Company, Charles Grants commission 1792,	354
20.	Charter Act 1813, General Committee of Public Instructions 1823	355
21.	Lord Macaulay Report 1835, Wood's Dispatch 1854	355
22.	Indian Education Commission 1882 (Hunter Commission)	356
23.	DPI Director Public Instructions, Sadler Commission 1917-1919	356
24.	Dr. Zakir Report 1939, Sergeant Report 1944, Deoband Movement 1867	357
25.	Anjuman himayat Islam-1884, Nadwa 1894, Jamia mila Islamia 1920	358
26.	Teaching Methods In Muslim Madaris	358

Section 05- Education in Pakistan		
27.	Outline of All Plans and Policies	359
28.	Brief History of All Policies (1947-to date)	360
29.	Educational conferences 1947, & 1951 (2)	362
30.	Six-year Plan 1951-57 (1) & Five-year plans 1955 to date	363
31.	Educational commission 1959 (1)	364
32.	Education policy 1970 (1)	365

Male	Female	Transgender	Total
68.0%	52.84%	40.15%	60.65%

Community Wise

Rural	Urban	Total
51.56%	74.9%	60.65%

Literacy Rates from Independence to 2025

Year	Literacy Rate	Year	Literacy Rate
1947	15%	2004	54%
1951	16.4%	2009	57%
1961	16.3%	2017	58%
1972	21%	2022-2024	62.8%
1981	26%	(2025)	60.65%
1998	43%	Current	

Provincial Literacy Rates

Area	Gender Wise			Total	Rankings
	Male	Female	Transgender		
Punjab	71.98%	60.19%	41.3%	66.25%	Highest
Sindh	64.23%	50.21%	37.45%	57.54%	2 nd
KPK	64.57%	37.15%	44.67%	51.09%	3rd
Baluchistan	50.5%	32.8%	24.97%	42.01%	Lowest

NOTE: National and provincial literacy rates are for citizens having 10 years and above age. Current literacy rates are taken from National Economic Survey Report 2024-25 and Census report 2023 (for latest rates you can read latest National Economic Survey Report of Pakistan. Every report is available on website www.finance.gov.pk)

Current Education Policy

National Education Policy 2009 is our current educational policy.

- A draft was designed for Educational policy 2017, but it was not approved.

- Federal ministry collected suggestions for development of draft of policy 2021 but draft was not finalized.
- National Education Policy Development Framework – 2024. A document created in 2024 for guidelines for federal and provincial education policies.

HDI and GDP on Education

Human Development Index (HDI)

It is a composite measure developed by the United Nations Development Programme (UNDP) to assess a country's overall level of human development.

It combines three key dimensions:

- Health** – measured by life expectancy at birth
- Education**: measured by mean years of schooling/expected years of schooling
- Standard of Living**: measured by Gross National Income (GNI) per capita.

HDI Ranking of Pakistan has fallen to 168th out of 193 countries on the UNDP Human Development Index (HDI). The country's HDI value is 0.544. (Ref: United Nations Pakistan, Report 7 May 2025).

GDP on Education

Pakistan's GDP on Education: For Fiscal year 2024-25 (Current) stood at 0.8% percent of GDP. Previous years GPD utilization was as follows.

2022-23	2021-22	2020-21	2019-20	2018-19
1.5%	1.7%	1.4%	1.9%	2.0%

UNESCO Recommended: at least 04% of GDP on education for developing countries.

Here is a difference between GNP and GDP

- Gross National Product (GNP):** The total value of all final goods, services produced by a country's citizens or businesses, whether inside or outside the country, during a specific period. It shows the overall economic strength and income of a nation's people.
- Gross Domestic Product (GDP):** The total value of all final goods, services produced within a country's borders during a specific period, no matter who produces them.

Vision 2025 of Pakistan

Aims of Vision 2025 is To make Pakistan the next "Asian tiger".

Vision 2025 was roll out by PML-N government on august 11, 2014 by the ex- prime minister Nawaz Sharif. "The vision is document roadmap and an implementation strategy for Pakistan in the next one decade"

Pillars And Goals:12-year vision has total 07 pillars & 25 goals, pillar 01 "developing human & social capital" is related to education

Some basic goals of vision 2025 related to education are

Chapter 02

INTRODUCTION TO EDUCATION/ FOUNDATIONS OF EDUCATION

Education

Origin

Education is derived from Latin word *Educere / Educare* (Craft-1984).

- *Educere* means draw out, bring out, lead and
- *Educare* means to bring up

Educatum: The act of teaching and training is called Educatum'

Educology: the study or knowledge of education" (Steiner, 1981).

Definition

- "**Education** is a process of holistic development of individuals (human personality) by acquiring knowledge, skills, values, beliefs and habits through formal, informal, non-formal or virtual means"
- Education is a process of implementing knowledge, skills, values, and beliefs into individuals. It is the medium through which individuals acquire knowledge, develop cognitive and practical skills, and build character.
- **Education** is a process aiming at modification of human behavior.
- **UNESCO** (SDG-04) defines education a "A lifelong process involving formal, non-formal, and informal learning, encompassing Acquisition of knowledge, skills, values, beliefs and habits"
- **Oxford Dictionary** defines "Education as "Process of teaching, training, and learning especially in school, college or universities to improve knowledge and develop skills"
- Education is a process as well as product.

Components	Explanation
▪ Knowledge ▪ Skills ▪ Values ▪ Beliefs ▪ Habits	What you know. For example Water Cycle What you can do. For example how to drive a car. What Principles you follow that guide your behavior- Honesty. What you hold as true. For example believe in oneness of Allah What you regularly do. For example daily exercise

- **David Herdlinger KASH Model:** (KASH: Knowledge, Attitude, Skills, Habits) He divided KASH into two groups one (Knowledge and skills) and other (Attitude, habits)
- *Education has been recognized and guaranteed as a basic human right by United Nations under Universal Declaration of Human Rights (1948)*

Definitions (Greek Scholars)

- “Education is to produce a virtue man” **Socrates**
- “Education is a process of bringing out of ideas of universal validity which are latent in the mind of every man” **Socrates**
- “Capacity to feel pleasure and pain at right moment is education” **Plato**
- “Development of mind and body is called education” **Plato**
- “Education is a process of creation of sound mind in a sound body” **Aristotle**
- “Education is process of training man to fulfil his aim by exercising all the faculties to fullest extent as a member of society” **Aristotle**

Definitions (Western Scholars)

- “Development of all those capacities in the individual which enable him to control his environment and fulfil his responsibilities is education” **Johan Dewey**
- “Education is a process of Reconstruction of experiences” **Johan Dewey**
- “Education is a social process; it is not a preparation for life but is life itself” **Johan Dewey**.
- “Process of formation of Highest moral character of individual by many sided interests is known as education” **Herbert**
- Education is an “Activity of integrated and gradual development of individual abilities” **Pestalozzi**
- “Process of development of child individuality in natural environment” **Rousseau**
- “Process of preparation for making life pleasant and acquaintance with right principle of life is called education” **Frobel**

Definitions (Muslim Scholars)

- “Education is a process which develops obedience to God” **Ghazali**
- “Process which helps in exploring the truth through insight, thinking and subjection to God is named as education” **Ibn-Khaldun**
- “Mode that helps in promoting the natural perception through training for attaining the height of servitude to God is known as education” **Shah Wali Ullah**
- “Education is a process of polishing capabilities of individual and equipping him with saleable skills resultantly providing the society positive and productive citizen” **Sir Syed**
- “Process that helps in character building of new societies is education” **Quid E Azam**
- “Education provides and promotes for growth and development of khudi whereby making the life unique” **Allama Muhammad Iqbal**

Elements of Education

There are 04 elements of education which are

- a) **Objectives:** The intended learning outcomes that define what learners should achieve.
- b) **Curriculum:** Planned content, learning experiences, and activities designed to achieve the objectives.
- c) **Pedagogy:** The methods and strategies teachers use to deliver instruction effectively.

Chapter 03

TEACHING METHODOLOGY/ INSTRUCTIONAL STRATEGIES

Teaching

The process of imparting knowledge, skills, values, or information to others, typically in a structured or systematic manner. It involves the transfer of knowledge from a teacher to a learner, with the goal of facilitating learning, understanding, and development.

- Teaching is the means where-by the experienced members of the group guide the immature and infant members in their adjustment of life (**Yoakam and Simpson**)
- Activities that are designed and performed to produce change in behavior (**Clarke**)
- Teaching is the stimulation, guidance, direction, and encouragement of learning (**Burton**)
- Process of giving lessons to students in school/college to help them to learn better by giving them information (**Oxford Dictionary**)

Nature and Components of Teaching

Teaching is a triangular process which consists of three focal points /components, which are as follows.

- i-Teacher
- ii- Students
- iii-Subject Matter

Features of Good Teaching

- Stimulation, active process, learners' engagement.
- Instructors are well prepared.
- Instructors excite and motivate students.
- Instructional relevance, purposeful and matter of drawing out.
- Instructors communicate effectively with their students.
- Questing-answering and feedback during instructions.
- Flexible and inclusive teaching.
- Establish a positive relation with learners and brings latest information to students.
- Easy to difficult or simple to complex methodology.
- Involve students in learning, Learner based instruction.
- Maximize students talk time and activities. Constructive, inquiry based teaching.

The four components (Aces) of Effective Teaching: Bulger and Sean identified four Aces of effective teaching which are Outcomes, Clarity, Engagement, and Enthusiasm

Tutoring	Teaching
Involves one teacher with one student or a very small group; usually personalized.	Involves one or more teachers with a larger group of students; usually formal.

Pedagogy

- It is Method of teaching of young children /art of teaching
- Term coined by Socrates. Pedagogy means to “Lead the Child”
- Term pedagogy is derived from two Greek words Paidos (boy) and Agogos (leader)
- Learner is dependent on teacher for guidance, evaluation & acquisition of knowledge
- Purposes are objective, curriculum & assessment.
- Its five approaches are teacher centered, collaborative, inquiry based, integrated, reflective. In broad sense term pedagogy is considered as “methods of teaching”.

Andragogy

- Derived from two Greek words Andra (man) and Agogos (leader)
- Method of teaching (instructions) for adults
- Term coined by Malcolm Knowles (USA) that's why known as father of Andragogy.
- Malcolm Knowles introduced the term "andragogy" in his 1968 article "Androgogy, Not Pedagogy!"
- It is self-directed, for attainment of experience, solving problems & self-actualization
- Five assumptions are self-concept, experience, readiness, orientation to learning, motivation.
- First book on adult education “*Adult learning*” published by Thorndike & his colleagues in 1928, he said learning “is possible till age 45 years.

Heutagogy

- Derived from Greek word *Heuriskein* (meaning self). Coined by Haze & Kenyon in 2000.
- It is study of self-determined learning, learning according to ones' own needs, preferences and interests from his desired learning resources.

Cybergogy (Virtual Educationg)

- Teaching and learning via computer, internet and ICT (Information and Communication Technology) is called Cybergogy. It is a strategy for virtual learning environment for the advancement of cognitive, emotional and social learning of the students.

Peeragogy

- Teaching of students to their same age fellows (Peers) or classmates. It is also called Peer tutoring, peer teaching, peer learning, “paragogy”. Assessment made by peers is called peer appraisal or peer evaluation. Feedback provided by the peers is called Peer review.
- It is a collection of “the best practices of effective peer learning. It is a theory of peer-to-peer learning and teaching that addresses self-directed learning. It was given by **D.W Allen** (Founder of Microteaching)

Critical Pedagogy

- Critical pedagogy is a teaching approach that aims to empower students to become critical thinkers and agents of social change. It was introduced by **Paulo Freire**

Maxims of Teaching

“The rules for presenting difficult terms and concepts to make them easy to comprehend in classroom teaching”. Content presented in easier and meaningful form for students.

- From simple to complex,
- From known to unknown
- From whole to part
- From concrete to abstract
- From direct to indirect
- From particular to general,
- Analysis to synthesis
- From empirical to rationale
- From psychological to logical to follow nature.

Teaching: Is a process,

Instruction: Is direction,

Learning: Is change in behavior,

Maturation: Is a process where individual learns to react to situation in

Learning Styles/VARK Model/Modalities of Learning

How a child learn best are called modalities of learning or learning styles. Modalities of learning can be measured by classroom assessment. The **four core learning styles** (The VARK model) include Visual, Auditory, Reading and writing, and Kinesthetic was developed by Neil D. Fleming. Neil D. Fleming is a New Zealand teacher and educational theorist who created the **VARK model** to help individuals understand their preferred learning styles.

- i. **Visual Learners;** The visual learners are better able to retain information when it's presented to them in a graphic depiction, such as arrows, charts, diagrams, symbols,
- ii. **Auditory learner;** It is also called “aural” learners, auditory learners prefer listening to information that is presented to them vocally
- iii. **Reading and writing;** focusing on the written word, reading and writing learners succeed with written information and textual resources.
- iv. **Kinesthetic Learners;** Taking a physically active role, kinesthetic learners are hands-on and thrive when engaging all their senses during course work. These learners tend to work well in scientific studies

Dual coding is combining words and visuals such as pictures, diagrams, graphic organisers with the subject material in order to improve the learning & memory of the student.

VAK teaching: Involves three sensory activities Visual, Auditory, and Kinesthetic.

Teaching	Instructions
▪ Teaching is a broader concept that encompasses the entire process of imparting knowledge, skills, and understanding to students. ▪ Teachers uses a variety of instructional	▪ Instructions are specific and direct statements or guidance given to students to perform a particular task or complete an activity. ▪ Instructions are typically straightforward

strategies in his teaching - Teaching involves two-way communication between the teacher and students. - Teaching is an ongoing and continuous process that takes place over an extended period	and focus on a specific task or activity - Instructions are often more one-way communication, where the teacher provides clear directions - Instructions are usually given in a specific context and are often brief and immediate.
---	---

Learning

“A permanent change in behavior of an individual as a result of teaching or experience” or
It is knowledge, skills or values acquired by an individual due to teaching or experience” or
“Growth resulting from experiences”

Nature of Learning

- Learning is the relatively permanent change in behaviour.
- A continuous life-long and universal process.
- Learning is purposive and goal directed.
- It involves reconstruction of experiences.

Characteristics of Successful learning

- Students gain and retain knowledge of the content of the course.
- Students develop critical thinking skills.
- Students integrate knowledge within and across disciplines.
- Students develop the ability to work in a team to solve a problem

Laws of Learning

Presented by Edward Lee Thorndike in his theory of trial and error learning, he formulated these laws and theory in after a famous cat-experiment.

Primary Laws of Learning

- i) **Law of Readiness:** Degree of preparedness and eagerness to learn individuals learn best when they are ready to learn, they will not learn much if they see no reason for learning.
- ii) **Law of Exercise:** things that are most often repeated are best remembered. There are two sub laws of exercise. Law of Use and Law of disuse
 - Law of Use:** Learning are strengthened with repeated trial or practice
 - Law of Disuse:** Learning are weakened when trial or practice is discontinued
- iii) **Law of Effect:** learning is strengthened when it is accompanied by a pleasant or satisfying feeling, learning is weakened when it is associated with an unpleasant feeling. The emotional state of the learner affects the learning (operant conditioning)

Key Terms in Learning

Minimum Levels of Learning (MLL) Educational Attainments National Education Policy 1998 specified basic competencies to be achieved by all children at the primary stage in selected subjects, such as Urdu, mathematics, Science etc. across the country.

Basic Learning Needs comprise both essential learning tools (literacy, oral expression, numeracy, problem solving etc.) and the basic learning content (knowledge, skills, values, attitudes, etc.) required by human beings to develop their full capacities, to live and work in dignity.

Domains of Learning: Cognitive domain, Affective domain and Conative domain (Psychomotor), are 03 domains of learning.

Five dimensions of Learning: Why- What-When-Where- How. These are also called 4W and 1 H of Learning Why (objective), What (topic), When (time), Where (classroom), How (method)

Types of Learning

- **Facilitative Learning;** Students ask questions, discover answers and apply their knowledge to a real-world problem. Teacher involves learners in learning In Facilitative learning. For example in a science class, students work on a project to design and build a sustainable energy device. The teacher acts as a facilitator, providing guidance and resources **4As of facilitative learning** are Activity-Analysis-Abstraction-Application (these are also called 4As of learning)
- **Active Learning:** Style of learning where students are involved in instruction, it is learner centered learning, it emphasizes higher order thinking often involve group work. i.e, activities, problem solving, project based learning.
- **Passive Learning:** Style of learning where students are not involved in instruction, learning is teacher directed only for example lecture method.
- **Asynchronous Learning** Students learn different similar materials at different times and location, Students and teacher are not interacting (Live) at same time Feedback and response are not provided immediately (communication are not live). Students learn according to their own needs and pace. Email, You-tube lectures, class blogs, websites.

Synchronous Learning Students and teacher are interacting (live) at same time either physical or by virtual means, students learn same things at the same time in presence of

- teacher, it is more engaging & effective. Feedback and response are immediately provided (real time communication) i.e., physical class, video conference, live chat etc
- **Collaborative Learning:** an umbrella term that covers many different methods in which students work together to solve a problem, complete a task, or create a product. Collaborative learning is founded in the concept that learning and knowledge building is social and requires active engagement from students.
- **Universal Design for Learning (UDL):** a framework to improve and optimize teaching and learning for all people based on scientific insights into how humans learn. three principles related to them: multiple means of engagement, multiple means of representation and multiple means of action and expression.

Chapter 04

TESTING, MEASUREMENT, ASSESSMENT & EVALUATION AND TAXONOMIES IN EDUCATION

Testing Elements

Test, Measurement, Assessment and Evaluation are called are called **Testing Elements**

Test (Narrowest in scope)

Test is derived from Latin word “Testum” which means “Lid of Vessel” It is defined as “Instrument used for measuring sample of behavior (Norman E Gronlund)” **or** “Formal and systematic procedure of getting information” **or** “A set of questions having correct answer that examinee usually answer orally or in writing” (Ebele & Frisble).
✚ Test is considered as **Tool, device or instrument** for data collection.

Purpose: To find out how much a student has learned from teaching or training.

Example: A math test with 20 questions to check students’ understanding of Addition and Subtraction.

Measurement

It is derived from Latin word “Mensura,” means " measuring. It is defined as “Quantification or scoring of tests” **or** “Limited to quantitative description of pupil’s performance” **or** “obtain information in quantitative way” (Mehran’s & Lehman’s)

✚ Measurement is **Numerical Value**

Purpose: To obtain quantitative data about a particular attribute or characteristic.

Examples: Measuring height in centimeters, weight in kilograms, or test scores in percentage.

Assessment (Appraisal)

It is derived from Latin Assidere which means “to sit beside or with” It is defined as “It is interpretation of measurement data it makes sense of data collected from students’ performance (Murry Print)” **or** “ process of collecting, interpreting, recording & using information of student’s response against specific educational task” **or** “Gain information about student learning” (Gay). It encompasses various methods and tools used to gather information about students’ learning, progress, and understanding. It is both qualitative & quantitative. All tests are assessments, but all assessments are not test

✚ Assessment is also called **Appraisal**

✚ According to Carole Tomlinson “Assessment is today’s means of modifying tomorrow’s instruction.”

Purpose: To provide feedback, identify strengths & weaknesses and to guide instruction and learning.

Examples: Formative assessments, Diagnostic Assessment and Summative Assessments

Evaluation (Broadest in Scope)

It is derived from Latin "Evaluare," which means "to determine the value of." It is defined as "It is a value Judgment of student performance based on test" **Or** "Judgment of value, worth or quality of a process or program" (Ebel & Frisble). It assess teachers, instructions and students, performance" The central idea in evaluation is "value."

✚ Evaluation is **Judgment**

Purpose: To make decisions about future actions, improvements, or the effectiveness of an educational program or teaching method.

Examples: Evaluating a teaching program's effectiveness, determining if learning objectives have been met, making decisions about curriculum changes, BISE Annual Exams

Right Sequence of Testing Elements

Test → Measurement → Assessment → Evaluation.

* Most simplest & narrowest term is Test and most advance and complex term is Evaluation.

* Height is measured, Learning is assessed and Results are evaluated

Test	Measurement	Assessment	Evaluation
Tool, Device.	Number/Numerical value	Interpretation of measured data	Value Judgment
Thermometer	03 °C	Below Average	Very cold
Question Paper	30 Marks	Below Average	Poor Performance

Example 01	Example 02
Test: Students take a final math exam of 50 marks. Measurement: Ayesha = 45, Bilal = 25, Hina = 40. Assessment: Teacher sees Bilal is weak in algebra and geometry. Evaluation: Ayesha and Hina are promoted, while Bilal is given remedial classes before promotion.	Test: Students attempt a an English test with 100 Marks Measurement: Scores: Hira 80/100, Asad 50/100, Sana 29/100 Assessment: Teacher notes Hira's performance is good Assad's is performance is average and poor performance by Sana Evaluation: Students who got >40% are passed and who got <40 are failed

***Test:** Answers how well

***Measurement:** Answers how much

***Assessment and Evaluations:** Answers how good

Features	Assessment	Evaluation
----------	------------	------------

Meaning	The process of collecting and analyzing information about learning.	The process of making a judgment or decision based on assessment results.
Purpose	To improve learning and teaching by identifying strengths and weaknesses. Diagnose learning needs of students, Monitor progress during instruction., Provide feedback, Motivate students , Help in placement of students, to Inform the parents	To judge the quality, value, or outcome and make decisions (pass/fail, promote/demote). Selection decision, Effectiveness of program, Classification of students, measure achievements of students. Certification, Ensure accountability
Focus	Focuses on the process of learning.	Focuses on the final result or outcome.
Nature	Descriptive – explains what students can or cannot do. Pinpoints strength & weakness,	Judgmental – decides how good the performance is. Ranks individual, its data is final judgment.
Timing	Continuous – done during learning (formative).	Final – done after learning (summative).
Form	Both Qualitative & quantitative	Often Quantitative
Value	It is informative	It is decisive
Example	Teacher observes a student's writing progress during lessons.	Teacher gives a grade (A, B, C) or promotes the student based on final results.

Good Assessment

Teacher uses these four actions **collecting, documenting, reflecting on** and **using information** during any Assessment.

- Give us Sensible, correct and valuable information about learners progress
- Fair to all students.
- systematized
- Moral and keep the privacy and self-respect of the children involved.
- Hamidi developed a framework to answer the **Why** (Goals); **What** (Knowledge & Skills), **Who** (All students), **How** (different methods) and **When** (Continuous) and **How Much** to assess (Prevent over & Under Assessment).

Approaches to Assessments

There are Three (03) approaches of Assessment

- a. Assessment for Learning
- b. Assessment as Learning
- c. Assessment of Learning

Approach	Meaning	Time	Purpose	Examples
Assessment	A process where teachers use ongoing	Before or During the	To identify learning gaps, give feedback,	Formative, Diagnostic,

<i>for Learning</i>	assessment to monitor and improve students' learning progress.	learning process, Contiguous	and adjust teaching to improve learning.	Placement assessment
<i>Assessment as Learning</i>	Students take an active role in monitoring & reflecting on their own or each other's learning.	Continuously during learning.	To develop students' self-assessment and metacognitive skills so they can become independent learners.	Self-assessment, Peer Assessment
<i>Assessment of Learning</i>	A process used to evaluate and document what students have learned at the end of a teaching period.	After instruction or at the end of a unit/term. its periodic	To measure achievement, assign grades, and report learning outcomes for accountability.	End-of-term final Exams, report cards standardized tests.

a) Assessments For Learning

All assessment that are done before or during lessons to improve teaching learning rather than merely evaluating the end results of learning. It is a "**Practice Assessment**"

The main purpose is to close the gap between where the learner is at that point in time, to where they want to be. Teachers use assessment information to adjust their teaching strategies, with the emphasis on progress and achievement, rather than failure.

For example: Formative and diagnostic assessments, Pre-assessment.

i. Formative Assessment (Screven):

Assesses a student's performance during instruction, and usually occurs regularly throughout the whole instruction process. Its main purpose is to identify strengths, weaknesses of students and areas needing improvement to enhance learning and teaching before final evaluation. The goal is to monitor student learning and to provide effective feedback. Teacher can "rethink" and then "redeliver" the material to the children where needed based on results of formative assessments.

Examples: Teacher feedback on class assignments, quizzes during lessons, classroom discussions

ii. Diagnostic Assessment:

It is a form of pre-assessment or a pre-test where teachers can evaluate students' strengths, weaknesses, knowledge and skills before the instruction to plan remedial teaching. It is done before creating the instruction teacher identify medical reason and difficulties in learning like problem in language, reading, writing, speaking or focus on learning. It also Assess prior knowledge of the learners.

Examples: Pre-tests before a new unit, reading readiness tests, math skill checklists, or interviews to assess visual or auditory challenges.

iii. Placement Assessments:

Chapter 06

PHILOSOPHY OF EDUCATION**Philosophy****Origin:**

Derived from two Greek word “*Philos*” means love, “*Sophia*” means wisdom.

Literal meanings of Philosophy are Love for wisdom or Love for knowledge.

Father of Philosophy: Socrates

Definitions: “Study of nature, cause, principles of reality, knowledge and values based on logical reasoning” or “Rational investigation of truth” or “A guide to a way of life. or An activity and a comprehensive picture of the universe,

- **Plato:** “Knowledge of eternal nature of things”
- **Cicero:** “Mother of all arts”
- **John Locke** “Intellectual or moral activity”
- **Coleridge:** “Science of sciences”
- **Dewey:** “Education is laboratory in which philosophical distinctions becomes clearer and are tested”
- **Aristotle:** “Science that investigates nature of being as it is in itself”
- **Gentile:** “Education without philosophy would means failure to understand precise nature of education”
- **Fitch:** “Art of education will never completely clear without philosophy”
- **Spencer:** “True education is practicable only to true philosophies”

➤ Philosophy Asks a Question. What is the purpose of life?

Areas of Philosophy

(Branches/Modes of philosophy)

There are following areas of philosophy.

- i. Epistemology (Knowledge)
- ii. Axiology (Values)
- iii. Metaphysics (Reality)
- iv. Logic (Reasoning)
- v. Semantics (Meanings)

Epistemology, axiology and ontology are called foundation of philosophy.

 Epistemology:

Word Epistemology derived from the Greek words episteme (knowledge) and logos (reason or study). Epistemology is the most fundamental branch of philosophy. Epistemology is

philosophy of Knowledge, Study of knowledge or nature of knowledge (truth) which focuses upon our means for acquiring knowledge.. It discusses philosophically truth, falsehood, validity of knowledge, limits of knowledge and nature of knowledge, knower and known. Modern epistemology generally involves a debate whether knowledge can be acquired a priori or a posteriori.

- **Priori Knowledge** (what comes before): A knowledge without observation, experience or test. It is independent of experience or observation of physical world for example 'all bachelors are unmarried', I need food when hungry, I need water when I am thirsty.
- **Posteriori Knowledge** (what comes later): A knowledge based on observation, empirical experience, or test. It is dependent on experience, empirical evidence, or observation of physical world for example 'some bachelors are very happy', Fire is hot, Ice is cold.

Axiology

Axiology explores the nature of values it has 2 subdivisions

- **Ethics:** Deals with human conduct and examines moral values. It deals with right or wrong, good and bad for example helping others is good; lying is bad.
- **Aesthetics:** It deals with beauty, nature, art, taste and aesthetic experience for example a colorful painting or a pretty flower is beautiful.

Metaphysics (ontology)

Metaphysics literally means "beyond the physical." It deals with reality it is also called ontology (ultimate reality). Study of what is real (God, humans, and the universe). It has many branches

- **Theology:** Study of religion
- **Anthropology:** Study of human being
- **Cosmology:** Study of nature and structure of universe.
- **Cosmogony:** Study of how the world was created and why it exists.
- **Eschatology:** Study of life after death and the condition of the soul in the next world.

Difference between Ontology & Metaphysics

<i>Ontology</i>	<i>Metaphysics</i>
The study of what things exist in the world	The study of reality as a whole, How things exist and interact with each other
It is a branch or sub-field of metaphysics.	It is a broader field that includes ontology
Focuses only on what exists in the world.	Focuses on how things exist, how they work, and how they interact.
It describes what exists (descriptive)	It explains what exists (Explanatory)
Example; "Humans & animals exist."	"How humans and animals interact in reality."

- ✚ **Logic:** Related to reasoning, judgment, proposition, fundamental laws of thoughts
- ✚ **Semantics:** Determination of meaning of different words used in different languages.

Management Skills

Skills are defined as set of capabilities or abilities acquired deliberately to perform duties at work. Management skills are also called leadership skills.

Robert Katz identified three skills for leader/manager.

- i) **Technical Skills** performing a mechanic task, essential for carrying out operational tasks, important for lower-level managers and employees.
- ii) **Human Skills** understanding people & working with them, Human skills are important for middle-level managers who need to manage and lead teams, resolve conflicts. These are interpersonal skills
- iii) **Conceptual Skills** understanding a job, relationship of parts of organization, inside & with outside, decision making, planning, organizing come under this, vital for top-level managers and leaders.

Levels of Management

Hierarchy is defined as managerial layers exist in an organization. Generally, an organization has three levels of management.

Top management	Middle Management	Lower Management
▪ Managers at top layer are also called strategic managers. ▪ More focused on planning and conceptual activities. ▪ Possess few technical skills. ▪ Policy formation, making high-level decisions ▪ Approval of budget/program, Budget control ▪ Initiating of projects Staffing, ▪ Coordination, and Communication ▪ Administration ▪ Consists of senior leaders, and the highest-ranking officials within an	▪ Middle managers are also named as tactical manager. ▪ These takes direction from top managers and responsible to implement their directives to achieve their goals by overseeing performance of front-line managers ▪ Exists between “Top managers” and “Front-line managers”. ▪ Work by Analyzing & directing, Implementation Routine decision. ▪ Managers ▪ Translate strategic goals set by top-level management into actionable plans and tactics and report back to top managers.	▪ These are also referred as operational managers or Frontline managers ▪ These oversee day-to-day operations and ensure tasks are completed efficiently. ▪ Get the work done from non-managerial staff. ▪ They are responsible to execute the plans developed by tactical managers. ▪ They are bridge between management and non-managerial. ▪ Work by Implementation, Monitoring, Evaluation, Operational tasks and Supervision. ▪ Lower/supervisory managers plan and put

organization	Act as a bridge between top-level management and lower-level employees.	into effect day to day activity that should be carried out by the workers.
For Example Minister, Secretary Education, CEO	For Example Dy. Secretary, DEO, Dy. DEOs, AEOs	For Example Heads of Colleges and Heads of Schools

Three Tiers of Management System in Pakistan

Pakistan's education system operates through three levels of management the Federal, Provincial, and District.

- The Federal Ministry of Education:** makes national education policies, plans, and curricula, coordinates with provinces and international agencies, and provides funds.
- The Provincial Departments of Education:** under 18th amendment in constitution 1973 in 2010 provinces manage elementary to higher education, handle curriculum, teacher training, textbooks, and examinations.
- At the District level,** under the Devolution Plan 2001, local governments led by the Nazim and Executive District Officer (EDO) Education {Now renamed as Chief Executive officers District Education Authorities (CEO-DEA)}

Macro and Micro Management

Macro Management: It refers to the broad, high-level strategic oversight and direction of an organization. In the context of school management, it involves setting overarching goals, policies, and plans for the entire school system, rather than focusing on day-to-day operations.

- Scope:** Broad, strategic, long-term.
- Level:** Federal, Provincial or District level.
- Focus:** Policies formulation, resource allocation, strategic planning.
- Impact:** Entire education system or district.

Micro Management: Micro management involves detailed, hands-on control of day-to-day operations. In the context of school management, it refers to the close supervision and direct involvement in the specific activities and tasks of the school like classroom management, division of work among staff members, timetable implementation.

- Scope:** Detailed, operational, day-to-day.
- Level:** Principals, Headmaster, Headmistress, department heads, teachers.
- Focus:** Classroom activities, teacher performance, student behavior.
- Impact:** Individual classrooms and daily school functions.

*Chapter 09***EDUCATIONAL PLANNING**

Futurology: It means the study of possible, probable, and preferred futures. It is the study of what might happen in the future based on patterns, trends, and present situations.

Strategy: A strategy offers a broader, long-term approach to achieving goals, emphasizing the overall direction and adaptability to changing circumstances. Provides a boarder, long term goals and directions. Concentrates on the "**what**" and "**why**" For example teaching strategies for achieving educational objectives.

Plan: A plan is a detailed proposal for achieving a specific goal. It outlines the steps, resources, timelines, and actions required to accomplish the objective. It is framework, roadmap or outline that shows how the goals of an organization are going to be achieved.. Planning is all connected with "**what**" we want to achieve and "**how**" to achieve it. For example Lesson plan. A French word 'purveyance', is used for planning which means to look ahead.

Planning

Panning is the process of developing a plan, involving analysis, decision-making, and strategy formulation. For example Process to develop Lesson plan. Planning is a continuous and integrated approach.

- **Oxford-Dictionary:** "some devise something to be done, some actions are involved beforehand"
- **Fayol:** Process of studying something for future & arranging program of operation
- **Y-Dorr:** Process of preparing set of decision, action for future, optional means & achieving the objectives.

UNESCO has identified **six steps for planning:** (Detail of these steps is provided in Planning process of Pakistan, as Pakistan follows these steps In planning process)

- (i) Pre-planning (objectives)
- (ii) Planning (Target Setting)
- (iii) Plan Formulation (Documenting the plan)
- (iv) Plan Elaboration (Breaking into small steps)
- (v) Plan Implementation (Plan in action)
- (vi) Evaluation (including revision and re-planning)

Educational Planning

Seth Spaulding: Said educational planning consists of inputs, throughputs & output analysis

“Educational planning is creating a plan of action for providing quality education to students, it is about how to use resources, setting activities, procedures and policies in advance to meet the educational objectives”

Chapter 15

GUIDANCE & COUNSELING

Guidance

Word Guidance is derived from French word guider means "to guide, lead, conduct". Literally guidance means 'to direct', 'to point out', and 'to show the path'.

“A process of helping individuals to understand themselves, their world, & to make them able to resolve their problems by themselves”.

Crow and Crow defined as ‘Guidance is assistance made available by personally qualified and adequately trained personnel to an individual of any age to help him manage his own life activities, to develop his own points of view, make his own decisions and carry his own burdens’

- It is “Assistance given to the learner by the instructor in order to facilitate his achievement in the learning process. Guidance is a programme of service intended to help students acquire the capacity for self direction or self guidance”
- Guidance is a concept as well as a process. As a concept guidance is concerned with the optimal development of the individual. As a process guidance helps the individual in self understanding (understanding one's strengths, limitations and other resources) and in self-direction (ability to solve problems, make choices and decision on one's own).
- A process of helping individuals to understand themselves and their world.
- It is assistance to the individual in the process of development rather than a direction of that development:
 - ✚ **Father of Guidance** is Frank person,
 - ✚ **Educational Guidance** started in 1905
 - ✚ **Heart of Guidance** is counseling
 - ✚ **Focal Point** of educational guidance is pupil development

Importance of Guidance

- Adjustment in life
- Selection of choices (Chose group, degrees, subjects)
- Solution of problems (Personal, social, educational, and career problems)
- Promotion of growth of individual in self-direction.
- Assists the individual to become adjusted to the environment.
- Aimed to help all type of individuals

Chapter 16**EDUCATIONAL RESEARCH****Research**

“Purposeful activity directed towards the development of organized body of scientific knowledge” or “Systematic activity/process/ analysis/investigation to find solution of a problem”

John W. Best said:

“Intellectual activity which brings to light new knowledge or correct previous error & add orderly way to existing corpus of knowledge”. He wrote book “Research in Education”.

Educational Research

Systematic activity/ process/ analysis/ investigation to find solution of an educational problem by using scientific method. It is normally considered as scientific research.

Characteristics of Research

- Conducted for the solution of the problem
- Emphasizes the development of generalization, principles, or theories
- Based on observable experiences
- Demands accurate observations
- Gather new data from primary or using existing data for new purpose

Characteristics of Research (Traditional 05-MOVIE)

i) Mathematical precision & accuracy: Exactness in measurement and clear use of quantitative data.

ii) Objectivity: Freedom from personal bias or emotions in judgment.

iii) Verifiability: Ability to check and confirm results through evidence or repetition.

iv) Impartiality: Equal and fair treatment without favoritism or prejudice.

v) Expertness: Skilled and knowledgeable handling based on training and experience.

Characteristics of Research by Tuckman B.W He said research is Systematic, Logical, Empirical, Reductive, Replaceable & Transmissible.

Classification of Research

Two basic types of research are

- a) Research by Purpose
- b) Research by Method

Research by Purpose	Research by Method
i. Basic Research	i. Historical Research
ii. Applied Research	ii. Descriptive Research
iii. Action Research	iii. Experimental Research
	iv. Causal Comparative Research
	v. Correlational Research

Research by Purpose

Basic Research (*Pure/Fundamental Research*)

- ✚ Research Conducted for **Theory Development**.
- ✚ It discovers useful educational theories like motivation, reinforcement, and concept formation.
- ✚ The discovered principles are applied on broad level.
- ✚ Conducted in laboratories which require a lot of work.
- ✚ Higher Control on variables.
- ✚ Conducted by researcher, experts/educationists
- ✚ Animals used as a sample for study. Experts are trained.
- ✚ Aims to create and expand knowledge, Usually, these involve "how," "what" and "why" questions to explain occurrences
- ✚ Example Thorndike developed laws of learning by experimenting on a cat in lab.

Applied Research (*Field/ Functional Research*)

- ✚ Conducted for **Application of theory**.
- ✚ Conducted in field by educationists (teachers and educational researchers)
- ✚ There is less control on variables.
- ✚ Focuses on solving specific problems by use of theories
- ✚ Aims to address practical issues.
- ✚ Example: Application of operant conditioning (rewards) of Skinner in classroom.

Action Research (*Classroom Research/Cyclical Research*)

- ✚ Conducted to resolve **Immediate local or Classroom problem**
- ✚ Conducted in classroom under light control (less generalizable)
- ✚ Conducted by teachers, students used as a sample
- ✚ Immediate application, decentralized approach, poor quality & non applicability
- ✚ It is cyclical because it repeats its process for solution of a single problem.
- ✚ A practitioners attempt to study their problems scientifically in order to guide, correct and evaluate their decisions and actions.
- ✚ A teacher conducts action research to improve his own teaching.
- ✚ A school administrator conducts action research to improve his administrative behavior.

*Chapter 19***Classroom Communication/
English Language Communication Skills****Communication**

It is derived from Latin word “Communes” which means “common or to join”. “The exchange of meaningful information between two or more persons”

It is a two-way, continuous processes for exchange of ideas, thought, messages, speech, visuals, signals, writing and behavior.

Components of Communication (it starts with idea origination)

- i. **Source** - produces the raw information
 - ii. **Transmitter or Encoder** - transforms or encodes the information into a suitable form
 - iii. **Message or Signal** - the transformed information. It is prerequisite for communication
 - iv. **Medium/Channel** - mode by which the message is transmitted
 - v. **Receiver or Decoder** - translate or decodes the message back to its original form
 - vi. **Feedback**- the intended recipient of the information
- ✚ Three Main components are Sender-channel-receiver.

Classroom Communication

Classroom communication: is the way teachers and students share information, ideas, and feelings. It involves both talking and listening to make learning happen.

- Successful teaching is generally considered to require only 50% knowledge to 50% communication skills.
- The basic function of classroom communication is to facilitate learning.

Classroom Communicative Competence is a student's ability to use language effectively and appropriately to participate and succeed in a classroom. It's not just about knowing grammar; it's about knowing how, when, and why to communicate for learning. Teachers must define classroom communicative competence in terms of what students need to know in order to communicate, participate, and interact effectively in the learning environment.

Classroom communicative competence includes the teacher's ability to create an environment where communication is culturally neutral, gender-sensitive, and inclusive, ensuring that all students feel safe, included, and able to participate effectively.

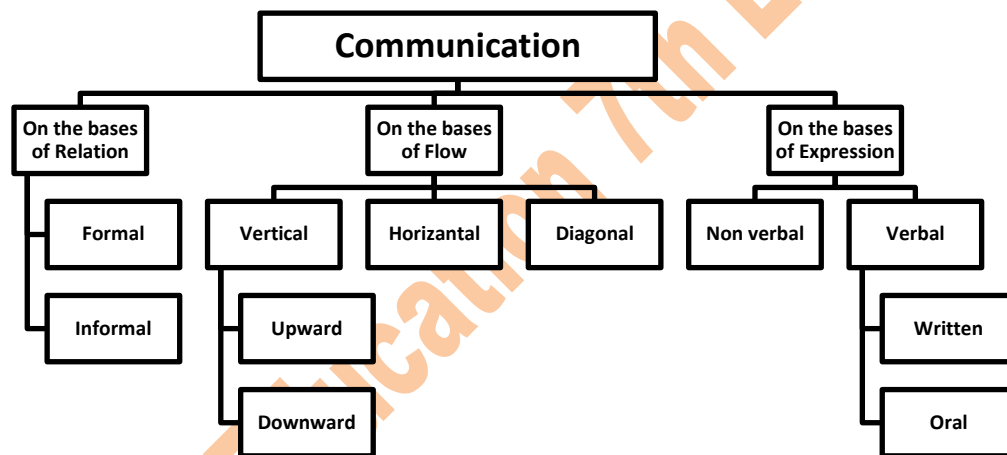

Hugh Mehan Classroom Communicative Structure follows the IRE pattern (initiate-response-evaluate).

- i. The Teacher initiates

- ii. The Student responds
- iii. The Teacher evaluates the response.

Communication Apprehension is the fear or anxiety associated with either real or anticipated communication with others.

- **Receiver Apprehension:** Anxiety about understanding or interpreting messages, causing students to avoid responding.
- **Writing Apprehension:** Fear or nervousness about writing tasks, leading to hesitation in written assignments.
- **Communication Apprehension (Oral):** Anxiety about speaking or participating verbally, making students avoid class discussions.

Types of Communication based on Flow

- i. **Vertical:** communication from higher to lower or lower to higher level.
 - **Downward:** flow of information from higher to lower level, from head to teacher for examples; notice board, School notifications for vacations.
 - **Upward:** flow of information from lower to higher level, from teacher to head for example; suggestion box. Application for leave.
- ii. **Horizontal:** flow of information among individuals of same level from teacher to teacher,
- iii. **Diagonal:** is a sort of hybrid between vertical and horizontal communication, example dialogue between members of organization having various ranks.

Past Interview Questions

SET-01

Educational Stats, Introduction to Education

1) Define Education? / What is your definition of Education? /

Education is derived from Latin word **Educere / Educare (Craft-1984)**. **Educere** means draw out, bring out, lead and **Educare** means to bring up

- “**Education** is a process of holistic development of individuals (human personality) by acquiring knowledge, skills, values, beliefs and habits through formal, informal, non-formal or virtual means”
- **UNESCO (SDG-04)** defines education a “A lifelong process involving formal, non-formal, and informal learning, encompassing Acquisition of knowledge, skills, values, beliefs and habits”

2) Which is the Current Educational Policy of Pakistan?

National Education Policy 2009 is our current educational policy of Pakistan.

- A draft was designed for Educational policy 2017, but it was not approved.
- Federal ministry collected suggestions for development of draft of policy 2021 but draft was not finalized. So, National Education Policy 2009 is our current educational policy of Pakistan.

3) What is HDI? What is HDI of Pakistan?

Human Development Index (HDI): It is a composite measure developed by the United Nations Development Programme (UNDP) to assess a country’s overall level of human development.

It combines three key dimensions:

- iv. **Health** – measured by life expectancy at birth
- v. **Education:** measured by mean years of schooling/expected years of schooling
- vi. **Standard of Living:** measured by Gross National Income (GNI) per capita.

HDI Ranking of Pakistan has fallen to **168th** out of **193** countries on the UNDP Human Development Index (HDI). The country's HDI value is 0.544. (Ref: United Nations Pakistan, Report 7 May 2025).

4) What is difference between GNP and GDP? / What percentage of GDP is utilized in Education in Pakistan? / How Much GDP utilization was recommended by UNESCO for Developing countries?

Pakistan's GDP on Education: For Fiscal year 2024-25 (Current) stood at 0.8% percent of GDP. Previous years GPD utilization was as follows.

2022-23	2021-22	2020-21	2019-20	2018-19
1.5%	1.7%	1.4%	1.9%	2.0%

UNESCO Recommended: at least 04% of GDP on education for developing countries.

Here is a difference between GNP and GDP

Gross National Product (GNP): The total value of all final goods, services produced by a country's citizens or businesses, whether inside or outside the country, during a specific period. It shows the overall economic strength and income of a nation's people.

Gross Domestic Product (GDP): The total value of all final goods, services produced within a country's borders during a specific period, no matter who produces them.

5) What was Vision 2025 of Pakistan?

Aims of Vision 2025 is To make Pakistan the next "Asian tiger".

Vision 2025 was roll out by PML-N government on august 11, 2014 by the ex- prime minister Nawaz Sharif. "The vision is document roadmap and an implementation strategy for Pakistan in the next one decade"

Pillars And Goals:12-year vision has total 07 pillars & 25 goals, pillar 01 "developing human & social capital" is related to education

Some basic goals of vision 2025 related to education are

- Increase primary school enrolment and completion rate to 100% & literacy rate to 90%.
- Increase higher education coverage from 7% to 12 %, and increase no. Of PhD's from 7,000 to 15,000

6) Who was First Minister of Education of Pakistan?

First Minister of Education of Pakistan was Fazal Ul Rehman.

7) Who is Current Federal Minister of Education of Pakistan?

Dr. Khalid Maqbool Siddiqi (MQM-Sindh)

For current Provincial ministers of Education visit Page No. 03 (Zone of Education-7th Edition-Subjective).

8) What is the official age for primary, Elementary and Secondary School students in Pakistan?

The official school age is as follows (As per Policy 2009)

ECCE	Primary	Middle	Matric
03-05 years	05-09 years	10-12 years	13-14 years

9) What is meant by OOSC? How much percentage of school going children is OOSC in Pakistan?

10) How can you deal with slow learners?

Individualized Instruction: Adapt teaching methods according to the student's pace and learning style to help better understanding.

Differentiated Instruction: teaching students in different ways according to their abilities, needs, and learning styles so that all students can learn effectively in the same classroom.

Extra Explanation and Examples: Provide additional explanations, simple examples, and extra resources when needed.

Encouragement and Motivation: Encourage students and celebrate small successes to build confidence.

Small Group Activities: Teach slow learners in small groups for better attention and support.

Use of Visual Aids: Use charts, pictures, diagrams, and videos to make learning clear.

Hands-on Learning: Allow students to learn by doing activities and practical work.

Frequent Assessments: Use short tests and class activities to check progress regularly.

Use of Technology: Use learning apps, videos, and digital tools for practice and revision.

Communication with Parents: Inform parents about progress and suggest help at home.

Patience and Encouragement: Be patient, supportive, and positive with slow learners.

Break Tasks into Steps: Divide difficult tasks into small and easy steps for learning.

11) Is learning a relative change and can it be negative?

Learning is typically considered a relatively permanent change in an individual's knowledge, skills, attitudes, or behaviors, learning can indeed be negative in some contexts for example learning how to smuggle things.

12) Tell the general and specific objective in union is strength story?

General Objective: is to convey the message that unity and collaboration can lead to success and overcome challenges more effectively than individual efforts.

Specific Objective: is to illustrate how a group of weaker individual, by working together and combining their strengths, is able to defeat a powerful enemy, emphasizing the idea that unity can result in achieving seemingly impossible goals.

13) What is Cognition, Metacognition and Hot cognition?

Cognition: Cognition is the process of thinking, understanding, learning, and remembering information. For example, Reading a story and remembering its main idea is cognition.

Metacognition is thinking about your own thinking. It means planning, monitoring, and evaluating your learning. For Example, Before solving a math problem, a student thinks, "Which method should I use?"

Hot Cognition: Hot cognition is thinking influenced by emotions or feelings. For example, A student feels excited about a science experiment and thinks creatively to solve it.

14) What are different strategies for discussion method of teaching?

Answer: Read Page No. 37 (Zone of Education-7th Edition- Subjective)

15) What is Inquiry based learning/Discovery Learning?

Answer: Read Page No. 39 (Zone of Education-7th Edition- Subjective)

16) What are difference among Collaboration, Cooperation and Coordination?

Collaboration Working together for a common goal often involves equal contribution from all participants

Cooperation: Working together but not necessarily involve equal participation in group work, individuals participates according to their capacity

Coordination: It involves harmonious integration of activities or efforts towards a common goal.

17) What is Learning by doing/ Activity Based Learning?

Answer: Read Page No. 42 (Zone of Education-7th Edition- Subjective)

18) What is Deduction /Deductive reasoning/Deductive inference?

Answer: Read Page No. 44 (Zone of Education-7th Edition- Subjective)

19) What is Induction /Inductive reasoning/Inductive inference?

Answer: Read Page No. 45 (Zone of Education-7th Edition- Subjective)

20) What is Question-Answer Method of Teaching?

Answer: Read Page No. 46 (Zone of Education-7th Edition- Subjective)

21) What is Chunking?

Chunking (Given by Miller): {is a memorization technique} Process of taking in smaller pieces of information and grouping them into bigger units A person can remember 7 chunks (with plus or minus 02, mean to say 5 or 09) of information. Miller called it as a "magic number seven, plus or minus two," which describes the limited capacity of short-term memory.

22) What is Differentiated Instructions?

Answer: Read Page No. 48, 49 (Zone of Education-7th Edition- Subjective)

23) What is role of Brainstorming

Answer: Read Page No. 49 (Zone of Education-7th Edition- Subjective)

24) A lesson requires group work but one student refuses to participate. How do you handle this?

I would assign a suitable role for the student and explain the importance of teamwork. Encouragement and positive reinforcement would help. I might discuss reasons privately and gradually involve them in activities.

25) A parent requests special attention for their child. How do you handle the request?

I would discuss the child's needs with the parent, plan additional support or activities, and monitor progress. Collaboration with other teachers or resources may be arranged. Regular updates to the parent would maintain transparency.

26) A student often gives incorrect answers. How will you correct them positively?

I would correct politely, explain the reasoning, and provide examples. Encouragement for effort would boost confidence. I would ask guiding questions to lead them to the correct answer.

27) Students are not attentive despite your teaching. What strategies will you use to engage them?

I would use interactive activities, questions, visuals, and relevant examples. Movement, group work, and hands-on learning would be included. Small rewards and encouragement could motivate attention.

28) A student asks a question you don't know the answer to. How do you respond?

I would honestly admit I don't know, assure the student I will find the answer, and follow up in the next class. This models honesty and encourages curiosity.

29) A child with special needs joins your class. How do you support them?

I would adapt teaching methods, provide inclusive activities, and offer additional support. Collaboration with specialists and peers would be encouraged. Patience and understanding would ensure the child participates effectively.

30) A school notice requires extra work beyond your duties. How will you respond?

I would plan my schedule to manage tasks efficiently. Prioritize important work and communicate if needed. Completing duties professionally while maintaining quality teaching is essential.

1) What is test? What is purpose of Testing?

Test is derived from Latin word "Testum" which means "Lid of Vessel" It is defined as "Instrument used for measuring sample of behavior (Norman E Gronlund)" **or** "A set of questions having correct answer that examinee usually answer orally or in writing" (Ebele & Frisble)".

Test is considered as **Tool, device or instrument** for data collection.

Purpose: To find out how much a student has learned from teaching or training.

2) Differentiate between Assessment & Evaluation?

Features	Assessment	Evaluation
Meaning	The process of collecting and analyzing information about learning.	The process of making a judgment or decision based on assessment results.
Purpose	To improve learning and teaching by identifying strengths and weaknesses. Diagnose learning needs of students, Monitor progress during instruction., Provide feedback, Motivate students , Help in placement of students, to Inform the parents	To judge the quality, value, or outcome and make decisions (pass/fail, promote/demote). Selection decision, Effectiveness of program, Classification of students, measure achievements of students. Certification, Ensure accountability
Focus	Focuses on the process of learning.	Focuses on the final result or outcome.
Nature	Descriptive – explains what students can or cannot do. Pinpoints strength & weakness,	Judgmental – decides how good the performance is. Ranks individual, its data is final judgment.
Timing	Continuous – done during learning (formative).	Final – done after learning (summative).
Form	Both Qualitative & quantitative	Often Quantitative
Value	It is informative	It is decisive
Example	Teacher observes a student's writing progress during lessons.	Teacher gives a grade (A, B, C) or promotes the student based on final results.

3) What is Process Assessment, how it is different from product assessment?

Process Assessment: It focuses on how learning happens, observing students' progress and performance during the learning process. It helps identify strengths, weaknesses, and areas for improvement.

For Example: During a writing lesson, the teacher gives feedback on drafts and guides students to improve, this is formative assessment.

Product Assessment: It focuses on what has been learned or produced at the end of the learning process. It measures the final result or achievement to decide success or failure.

For Example: At the end of the term, students take a final exam or submit a completed project, this is summative assessment.

4) What are approaches to assessment? What are Assessment for Learning, Assessment as Learning and Assessment of Learning explain all with examples.?

Answer: Read Page No. 79 (Zone of Education-7th Edition- Subjective)

5) What are the phases of evaluation?

Answer: Read Page No. 82 (Zone of Education-7th Edition- Subjective)

6) What are CATS? Give three examples of assessment in classroom?

Answer: Read Page No. 82 (Zone of Education-7th Edition- Subjective)

7) What are the types of evaluation/Assessment?

Answer: Read Page No. 82 (Zone of Education-7th Edition- Subjective)

8) How Formative Assessment is different from Summative Assessment?**Formative Assessment (Screven):**

Assesses a student's performance during instruction, and usually occurs regularly throughout the whole instruction process. Its main purpose is to identify strengths, weaknesses of students and areas needing improvement to enhance learning and teaching before final evaluation. The goal is to monitor student learning and to provide effective feedback. Teacher can "rethink" and then "redeliver" the material to the children where needed based on results of formative assessments.

Examples: Teacher feedback on class assignments, quizzes during lessons, classroom discussions

Summative Assessment:

Measures a student's achievement at the end of instruction, it is final, It is certifying judgment. It is used to assign grades, promote, or certify student performance. It focuses the final result so it is product-oriented. Once the course is finished no further revisions are made and we conduct summative assessment but if the revisions are allowed to make then it is no more summative [Rather it becomes formative assessment where children can get the opportunity to improve].

Examples: Annual school examinations, Standardized tests, Semester exams.

9) What is the purpose of Diagnostic Assessment?

Answer: Read Page No. 79 (Zone of Education-7th Edition- Subjective)

10) What is exam?

An exam, short for examination, is a formal assessment or evaluation of a person's knowledge, skills, or abilities in a specific subject or area of study. Exams are typically conducted in educational settings to measure a student's understanding of the material covered in a course

11) What is portfolio what are its types? Can we Assess a child by using her portfolio?

Answer: Read Page No. 83 (Zone of Education-7th Edition- Subjective)

12) Differentiate Standardized Test and Non-Standardized Test?

Answer: Read Page No. 83 (Zone of Education-7th Edition- Subjective)

13) What will you use to develop the questions in paper?

Table of specification with Bloom taxonomy's level of objectives.

14) What is Table of Specification (TOS)?

It is called blueprint for test. Table of Specification is two-way table/chart that provides graphic representations of the content of a course or curriculum elements and the educational objectives of topics. Is a two-way chart which describes the topics to be covered by a test and the number of items or points which will be associated with each topic according to objectives of the topic

Topics	Knowledge	Comprehension	Application	Analysis	Total
Topic 01	2	1	1	–	4
Topic 02	2	2	2	1	7
Topic 03	2	2	2	–	6
Topic 04	2	3	2	1	8
Total	8	8	7	2	25

Purpose of TOS

- i. Balanced test developed
- ii. Develop integration between content & objectives
- iii. Help in sampling from whole content
- iv. Helps in ensuring validity of test

Steps for Preparation

- i. Develop list of instructional objectives
- ii. Preparation of draft of course content
- iii. Preparation of two-way chart
- iv. **Y-axes** consist of content (Vertical axes)
- v. **X-axes** consist of objectives (Horizontal axes)

*Chapter 22***FATHERS, SCHOLARS, ETYMOLOGY & ACRONYMS****Fathers of Different Fields**

Sr	Field	Father
1	Father of Education in Muslims	Sir Syed Ahmad Khan
2	Father of American Education	Horace Mann
3	Father of Modern Education	J. Amos Comenius/ Pestalozzi
	Father of modern media in education	Edgar Dale
4	Father of Vocational training/Elementary education	Pestalozzi
5	Father of lesson planning	Herbert
6	Father of administrative process	Henri Fayol
7	Father of operational management	Henri Fayol
8	Father of scientific management	Fredrick Tylor
9	Father of guidance	Frank person
10	Father of psychology	Wilhem Wundt
11	Father of philosophy	Thales
12	Father of Computer	Charles Babbage
13	Father of Humanist Psychology	Maslow
14	Father of Psycho analysis	Sigmund Fraud
15	Father of research on teaching	N.L. Gage
16	Father of programmed learning	B.F. Skinner
17	Father of Naturalism, Negative Education	Rousseau
18	Father of Kindergarten	Frobel
19	Father of American psychology	William James
20	Father of Cognitive Psychology	Ulric Neisser
21	Father of Experimental Psychology	Wilhelm Wundt
22	Father of Functional Psychology	Johan Dewey
23	Father of Child or Developmental Psychology	Jean Piaget

EMINENT SCHOLARS

Sr	Name and period	Major works
1	Holy Prophet Muhammad ﷺ (571-633 AD) Makkah-Madinnah	Established Dar.e. Arqam in Makah (First Islamic School) Suffa in Madina (First residential Islamic University) First Revelation was “Iqra” (read) in Cave Hira Makkah at the age of 40 Years.
2	Hazrat Umar R.A .	Salaries to Teachers.
	Hazrat Usman R.A.	Jami-Ul-Quran (Quran in Book shape)
	Hazrat Ali R.A.	Chief Justice of Islam, Famous book on his summons “ Nahj al-Balagha (The Peak of Eloquence)” Prophet Muhammad ﷺ titled him “ Bab-Ul-Ilm (Door of knowledge)”
3	Imam Ghazali Abu Hamid Muhammad bin Muhammad. (1058-1111 AD Tus-Iran) Ghazali is known Hujatul islam	Division of knowledge into Frazeh, Fraz kifaya and Ilme mehmood and ilme mazmoom, Concept of 6 th sense, Physical Education in curriculum, Wrote Ahya ul aloom din (revival of religious science) kimyae saadat (alchemy of happiness) Tashfut ul flaisifa (incoherence of philosophers) Jawahar ul Quran (jewels of Quran) Maqasid al flaisifa (aims of philosophers)
4	Shah Wali Ullah Qutub-Din-Ahmad (1703-1762 AD)	Wrote Hujjat-ul-Balighah, Fouzul Kabeer, Izalatul khafan, Khiafaltul khulfaa First translation of Quran into Persian language, 51 books 23 in Arabic and 28 in Persian
5	Ibne Khaldun Wali Uddin Abu Zaid Abdul Rehman. (1332-1406 AD Tunis)	Divided knowledge into two categories Tabae aloom and Aloom e Taqleed Wrote: Muqadmah (introduction) and Arab philosophy of history Differentiated: History of Islam, history of Muslims Father of sociology and science of history. Recommended 3 steps Teaching process Provided Concept of Asabiya (Social collaboration)
6	Alfa Rabi Abu Nasar Muhammad Alfa Rabi (872-951 AD)	Differentiated Taleem (Instruction) and Tahdib (Discipline), Method of “learning by heart” Two aspects of instruction a- audition (learning based on speech) b- imitation

7	Ibn-E-Rushed (Averroes) Abu al Walid Muhammad Ibne Ahmad Ibne Rushed (1126-1198 AD Spain)	Divided soul into 5 faculties Wrote Book "The politic" (in which he wrote commentary on Plato's book republic) Founder of Transcendent Philosophy
8	Allama Zarnooji (1170-1225 AD)	Wrote "Taleem-ul-Mutalim, Tareeq-ul-Matalim Best timing for learning near Zarnogi Before dawn
9	Ibn-E-Seena (Avicenna) (980-1038 AD) Uzbekistan	Memorize Quran at the age of 10 years Wrote more than 100 books, Famous books are Alshifa (the cure) consists of 18 Parts, This book is known as Jamia al uloom Alqanun fi Al-tib (Canon of medicine) Divided knowledge into three categories
10	Molana Qasim Nanotvi	Established Dew band Movement & Madrasa Saharanpur utter Pradesh India on 30 May 1867
11	Caliph Hameed ul deen	Established Anjuman Himayat Islam 1884 Lahore
12	Molana shibli Nomani	Established Nadwatul ulma in Lucknow India in 1894 - officially started working in 1998
13	Molana Muhammad Ali Johor	Established Jamia Mila Islamia 1920 near Ali Garh. it transferred to Delhi in 1925
14	Charles Grants	Due to his efforts Charter Act 1813 came into being
15	Lord Macaulay	Lord Macaulay report 1835
16	Charles Wood	Wood's Dispatch 1854
17	William Hunter	Indian Education Commission 1882
18	Michel saddler	Sadler Commission 1917
19	Johan Sargent	Sargent Report 1944
20	Fazal ul Rehman (1 st Minister of Education)	Ist Educational Conference 1947 From 27 November to 1 Dec 1947 in Karachi
21	SM Sharif (Federal secretary of Edu. West Pak)	National Education Commission 1959 30 December 1958 to 5 January 1959
22	Noor khan (Air Marshal)	New Education Policy 1970 (26 March 1970)
23	Abdul Hafeez Pirzada	Education Policy 1972 (29 March 1972)
24	Muhammad khan Hooti (Education minister)	Education Policy 1979, Presented in 1978 implemented on January 5, 1979
25	Syed Fakhar Imam (Education minister)	National Education Policy 1992, Presented on 6 December 1992 published in March 1993
26	Syed Ghous Ali Shah (Education Minister)	National Education Policy 1998, Presented on 27 March 1998
27	Meer Hazer Bajrani (Edu minister) {Govt of PPP.}	National Education Policy 2009 Presented on 9 September 2009
28	Eng. Baleegh ul Rehman (Edu. minister) {Govt. of	National Education Policy 2017 MNSQEs

	Nawaz Sharif}	
29	Shafqat Mahmood (Education minister)	Single National Curriculum of Pakistan SNC-2020
30	Wilhelm Wundt (1832-1930), German	Structuralism, Introspection method, First Psychological Lab In Leipzig In 1879, father of modern and experimental psychology
31	William James (1842-1910), American	Father of American Psychology, Father of functional psychology, Functionalism, Book principles of Psychology 1890
32	John B Watson (1878-1950), American	Father of Behaviorism, presented Classical Conditioning Experiment on Boy Albert
33	Max-Wertheimer -German	Founder of Gestalt Psychology.
34	Abraham Maslow (1908-1970), American	Father of Humanist Psychology, Hierarchy of needs, Theory of motivation
35	Sigmund Freud (1856-1939), Austrian Neurologist	Father of Psychoanalysis theory (psychodynamics) , Id, Ego, Super Ego, Psychosexual Development Theory, Defense Mechanism, Theory of anxiety, Theory of life/death instincts (Eros / Thanatos Theory)
36	Carl Jung (1875-1961), Swiss Psychologist	Transpersonal Psychology, Theory of Personality , Concept of collective unconscious, Archetype
37	Ulric Neisser (1928-2012), German-American	Father Cognitive Psychology,
38	Albert Humphrey	SWOT analysis
39	Lev Vygotsky (1896-1934) Russian Psychologist	Social Development Theory, Zone of proximal development ZPD, MKO
40	Noam Chomsky (1928-) American Linguist	Nativism Theory (Theory of language acquisition device (LAD) 2006)
41	System Theory	Ludwig von Bertalanffy
42	Albert Bandura (1925-2021), Canadian American Psychologist	Social Learning Theory (learning by observation or imitation), Bo-bo doll experiment, Study of aggression. framework of self-efficacy
43	Erikson (1902-1994), German- US Psychologist	Psycho-Social Development Theory (8 steps)
44	Bronfenbrenner (1917-2005) Russian US Psychologist	Ecological Theory (5 system theory)
45	Lawrence Kohlberg (1927-1987) American	Moral Development Theory

ETYMOLOGY

Sr.	Words	Origin	Parent Word	Meaning
1	Education	Latin	<i>Educere</i>	Draw out, bring-out, lead
2	Education	Latin	<i>Educare</i>	To bring up
3	Discussion	Latin	<i>Discuter</i>	Shake or Strike
4	Test	Latin	<i>Testum</i>	Lid of Vessel
5	Assessment	Latin	Assidere	To sit beside
6	Curriculum	Latin	<i>Currere</i>	Runway/Path
7	Tabula Rasa	Latin	<i>Tabula Rasa</i>	Erased Tablet/Blank Slate
8	Existentialism	Latin	<i>Exsistere</i>	Stand out/To Be
9	Introspection	Latin	<i>Intra, Spire,</i>	Intra, "Within, Spire "Look
10	Moral	Latin	<i>Moss</i>	Habit.
11	Emotion	Latin	<i>Emovere</i>	Stir Up/Agitate/Excite
12	Administration	Latin	<i>"Ad" "Minister"</i>	Ad (Towards) Minister (Services/Look After)
13	Management	Latin	<i>Manus"</i>	Hand
14	School	Latin	<i>Schola</i>	School
15	Communication	Latin	<i>Communes</i>	Common
16	Quality	Latin	<i>Quails</i>	What kind of
17	Personality	Latin	<i>"Persona</i>	Qualities Of Person
18	Instruction	Latin	<i>Intruct</i>	Equip/prepare
19	Computer	Latin	<i>Computer</i>	Compute/Programmable machine
20	Validity	Latin	<i>Validus</i>	Strong/powerful
21	Reliability	Latin	<i>Re-liabilis</i>	Re- (back) liabilis (relied upon)
22	Method	Latin	<i>Methodus</i>	Way/path

Naeem Ullah Farooqi is working as an Assistant Education Officer in District Bhakkar. He has completed his M.Phil. in education from the university of agriculture Faisalabad (UAF). He has compiled six editions of his renowned book "Zone of Education." The 6th Objective edition is considered exemplary. The current 7th subjective edition is fully revised and up to date, covering all key areas of pedagogy required for competitive exams such as FPSC, PPSC, SPSC, AJKPSC, BPSC, NTS, STS & OTS the writer has more than five years of experience teaching online for various posts, including Headmaster, Headmistress, Assistant Director, TGT, SST, ECT, ESE, SDEO, ASDEO, AEO, & License Test Preparation. he also runs the fastest-growing Youtube channel named "Zone Of Education," Which is one of the most-watched pedagogy channels in all provinces of Pakistan.
